THE FAROE ISLANDS – YOUR PORT OF CALL

Magn hereby presents the Faroe Islands as a fully competitive and full-service port of call for the Oil- and Gas Industry. Situated closely to the oilfields on the North East Atlantic continental shelf, the Faroe Islands are well-situated and fully equipped to service offshore vessels with bunkers, water, supplies, crew change, repairs and every possible service.

In this booklet a select group of Faroese companies offer their services and give you an opportunity to see that we can offer the full range of products and services required by the offshore industry.

You will find our products and services fully competitive with those on the mainland. Moreover, as a seafaring nation we have a long tradition of servicing the naval industry, and our workforce is highly skilled and renowned for its flexibility and expert qualifications.

We hope you will find our services as attractive as they are competitive; enjoy the read.

Hendrik Egholm
CEO, Magn

Jóhanna á Bergi, CEO

AGENCY SERVICES

Faroe Ship is a leading transport, logistic and maritime agency provider. Established in 1919, we are in a significant position in the Faroese market and have sites all over the country in Tórshavn, Klaksvík, Rúnávik and Tvøroyri.

24/7 Services

Faroe Ship offers a comprehensive and flexible agency service to ship-owners and companies in the offshore industry, and we are fully capable of providing all our services to any type of vessel, such as offshore vessels and platforms, container ships, bulk ships, military ships, research ships, cruise vessels etc.

Including sales and marketing activities, services offered by Faroe Ship include clearing ships in and out of ports, communicating with customs, immigration and other authorities – seeking out favourable rates and freight insurances - provision deliveries, procurement, supply handling, crew change, material storage, waste services, bunkers and fresh water supply.

“Our reach is global, we work locally”

The company is part of Eimskip Group, benefiting from an international transport network, with freight services easily reaching throughout Europe with four weekly sailings between Tórshavn, Iceland, Scandinavia, the UK and the European continent. In conjunction with Maersk, the company also has regular links to America, Russia, the Baltics, Asia, Africa and the Middle East. Faroe Ship also has the largest domestic fleet of trucks in the Faroe Islands, and is also offering cold storage and warehouse services.

24/7 AGENCY SERVICES

- Agency services for the Offshore sector
- Comprehensive Logistics services

**YOUR WORK
YOUR ENERGY**

Leif Hovgaard, Sales Manager

Being one of the largest companies in the Faroe Islands, Magn – formerly Shell – has imported, stored, and distributed a wide variety of oil and oil-related products to Faroese and International customers since 1925. Being a full-service modern company, we service domestic and international vessels of different kinds, factories, offices, heavy machinery, and family houses.

Magn owns large stocks of gas oil in depositories around the Faroe Islands. In addition, Magn is the only Shell Brand lubricant vendor and carries large stocks of lubricant oils, hydraulic oils, soap products, and other oil & industry related products.

“Partner for offshore companies working in Faroese and North Atlantic waters”

BUNKERS FOR THE OFFSHORE

At Magn we know that the key to good partnerships is trust. Trust must be earned. We did not become one of the biggest companies in the Faroe Islands without effort, and we know that we will have to work hard to maintain this position and our reputation. This ongoing effort to stay on top is reflected in our numerous certifications, including ISO 9001, 14001, OHSAS 18001, Achilles and F-Pal.

Magn is a natural partner for offshore companies working in the Faroese and North Atlantic waters.

Terminal project is well underway
The construction of the new terminal and service-buildings is progressing accordingly to plan and work is expected to be finalised by spring 2014.

Jákup Sverri Kass, CEO

Services

Located in Sørvági, 40 minutes from Tórshavn, Vágar Airport is the only airport in the Faroe Islands, and so it functions as the Faroe Islands' main gateway to the rest of the world. Some 235.000 people used Vagar Airport in 2013.

Vágar Airport's main goal is to ensure safe and convenient international travelling. Other priorities include working closely with the local and international business-community and the travel industry, in order to create a sustainable and prosperous business environment. Vagar Airport wants to make the Faroe Islands easily accessible to any visitor. Car-rental is provided and the bus terminal always has busses and taxis at the ready. A big and modern tax-free area and good food is open to all travelers.

Capacity/ Track Record

In 2011, the runway was extended from 1255 to 1799 meters. This allows for significantly larger aircraft to land on the runway, improving flight regularity; additionally, a complete Instrument Landing system was implemented. Vágar Airport became the first airport in Europe in which an airline has approved Required Navigation Performance procedures for approach and departure.

A MODERN AIRPORT IN THE FAROE ISLANDS

Currently, Vágar Airport is in the process of building a brand new terminal and service buildings. The staff consists of approx. 35 people and two companies are handling ground services.

Traffic Regularity

When the runway was extended to 1799 meters in 2011 and the new ILS, LLZ and DME approach instruments were implemented, the regularity at Vágar Airport improved substantially.

Jóhanna Rasmussen, Sales Director

Hotel Føroyar is a beautiful 4 star hotel which is eloquently built into the hillside overlooking Tórshavn giving you the most beautiful and spellbinding panoramic view of the local fjord, the neighbouring island Nólsoy and the vast North Atlantic Ocean. Still, it is only a 20-minute walk down to the vibrant and rich cultural life of Tórshavn. The rooms are light with big windows, all standard double rooms are the same size and are equally equipped with free wireless internet and breakfast is also included.

Parking is free, and if you feel so inclined, bicycles are available so that you can experience the beautiful surrounding nature, first hand.

On the top floor of Hotel Føroyar you will find one of the most famous and renowned gourmet restaurants in the Nordic region, KOKS. At KOKS they tend the Faroese taste and odour paving the way for breath-taking experience by using local raw materials together with raw materials from the Nordic countries. KOKS has gained significant acknowledgement both locally and abroad by winning prizes such as 'Initiative of the Year 2013', and the "Stay&Eat 2013" prize in the Danish gastronomic guide Spiseguiden. In the lobby, the café 'Gras' serves light meals, drinks and coffee.

ROOM WITH A VIEW

Capacity

106 newly renovated rooms and suites.

7 well-equipped conference rooms suitable for small and large meetings and conferences; 2 to 400 guests.

Mouritz Mohr, Director

MEST has a long-standing tradition in ship-building, repairs and maritime services. At our full-service shipyards, our highly qualified workforce specialises in all aspects of shipbuilding, repairs and maritime services. Our dry dock, three slipways and maritime facilities enable us to provide re-buildings, repairs and maintenance of all kinds of vessels. Moreover, MEST's agencies represent a broad variety of the leading suppliers to the shipping industry.

MEST also offers a comprehensive spare-parts department, tugboats and cranes, and a workforce of over 180 people that include pipe fitters, steel workers, electricians, welders, and engineers.

PAM Offshore Services is also part of the MEST group. At PAM we have more than 200 skilled employees, who enable us to hold substantial framework agreements with eight companies, including KVÆRNER, AKER SOLUTIONS, AIBELL, COSL, SEC, and WESTCON. This enables us to grow steadily and to provide steady jobs for our skilled workforce. Taken together, MEST and PAM Offshore Services employ around 400 workers, skilled in all aspects of maritime services. This makes us your ideal offshore- and maritime partner in the North Atlantic.

MEST – HIGH-QUALITY SHIPBUILDING, REPAIRS AND MARITIME SERVICES

“We are a maritime nation - and MEST's yards are a key part of this. We strive to be the preferred partner to the maritime industry”

Available 61°59'85 & 006° 45'00		Security	Means of transport available Shuttle bus, taxi, city bus, intercity bus
		Port facility ISPS compliant Yes	

Annfinn Hjelm, Business Coordinator

Being the port of the capital, the Port of Tórshavn is the largest and busiest harbour in the Faroe Islands. As a thriving port with a truly international outlook, the port of Tórshavn offers an unrivalled concentration of quality maritime services and expertise. The port of Tórshavn has focused on the Faroese container traffic and roll-on/roll-off ferry traffic and has experienced an increase in calls from cruise ships as well.

In recent times, a process of consolidation has led to several smaller neighbouring municipalities being incorporated into the capital; consequently, more than 40% of the Faroese population lives within the municipal boundaries. As a result of the amalgamation, the operating area of the port of Tórshavn has increased significantly and now also includes harbour facilities at Sund, Kollafjørður and Oyrareingir. The four harbour areas directly controlled by the port of Tórshavn are the best served in the Faroe Islands and are the only Faroese harbours to be manned 24 hours a day, 365 days a year. This gives us a great deal of flexibility and allows us to find the best solutions for our customers. Additionally we have yet to experience a close-down due to weather conditions.

BROADBAND 70 MILES OUT TO SEA

Hans Jákup Langgaard, Corporate Director

Faroese Telecom's SeaNet gives you the opportunity of a fast Internet connection on board your ship.

“Our goal is to provide the same level of modern telecommunication opportunities to the ships that sail in Faroese waters as we provide to people on land,” says Hans Jákup Langgaard, head of corporate business at Faroese Telecom.

A few years ago, Faroese Telecom set up five broadcasting stations capable of transmitting mobile broadband to all of the Faroese territorial waters. Ships or boats that want broadband from Faroese Telecom are required to set up an outdoor antenna capable of receiving the 3G+ signal, which is then distributed around the vessel.

This wireless broadband set-up provides speed up to 7 Mbps. SeaNet runs on 900 MHz, which allows for increased broadband speed up to 70 miles out to sea. This means that SeaNet is a great advantage for ships, shipping companies and crews.

“The broadband offers improved communication between ship and shipping company. The distance will be no greater than between work places on shore, and the crew can maintain direct contact with their families and friends,” says Hans Jákup Langgaard.

The fully modern Faroese telecommunication network reaches every corner of the islands, and Faroese Telecom now operates three sub-sea cables connecting the islands to the world. In recent years, Faroese Telecom has expanded its activities to providing fibre connection to oil rigs west of the Shetlands and in the North Sea.

Situated in the heart of Tórshavn on main street Áarvegur, you will find the cozy 4-star Hotel Hafnia. As a true iconic fixture in downtown Tórshavn, Hotel Hafnia has been one of the most loved hotels in the country since its establishment in 1951, and currently it has one of the most popular restaurants in town serving international cuisine as well as seafood, where the Chefs focus on using fresh and local specialties.

At Kafe Kaspar, bagels, salads and home-baked items and drinks are available. Guest rooms feature minibar, tea/coffee facilities and private bathroom with shower. All are equipped with free Wi-Fi, satellite TV, and some include a seating area and free sauna access. From the hotel's roof terrace, there is a unique panoramic view over the whole town and harbour.

The qualified and friendly staff is on call around the clock. Within walking distance you will find local attractions, tourist information centre, shops and nightlife. The Airport Shuttle provides transportation to and from the hotel.

Hotel Hafnia is the perfect setting for meetings and conferences for up to 100 people. We have function rooms of different sizes to suit all needs, as well as the audio-visual and IT equipment to match your demand.

A SPECIAL PLACE IN TÓRSHAVN

We will provide any food and beverages you may need. Great versatility and agility on the part of the staff ensure you a smoothly run conference and a successful meeting.

We look forward to welcoming you at Hotel Hafnia.

QUALITY GUARANTEED

Jan Müller, Managing Director

FOÍB (Faroes Oil Industry Group), as the organisation representing the oil companies with exploration licences in the Faroes, is pleased to note the increased use of Faroese goods and services by the oil and gas industry.

FOÍB members take a particular satisfaction from this trend as it reflects a positive result from their investment in the Faroese competence development programme. This has been undertaken as part of the license holders' obligation to promote full local participation in the industry.

Through this, Faroese firms have been assisted to become fully equipped not only to face future challenges on home ground but also in neighbouring sectors.

Rúni Sundberg Patursson, Key Account Manager

Providing services 24/7, P/F Poul Michelsen delivers to all ports in the Faroe Islands and guarantees that all goods will be transported securely and responsibly. P/F Poul Michelsen especially excels in quality and delivery of frozen and chilled goods, all of which are shipped from a 5600m² warehouse which contains sections for chilled, frozen and dry goods. The company's fleet consists of 14 specially modified lorries which are always updated for correct and safe delivery to all sites and ports in the Faroe Islands.

Services

We provide provisions, food supply, bonded stores transport and logistics for fishing vessels, cruise ships, supply ships and oil rigs.

Location

P/F Poul Michelsen is placed in Tórshavn, Faroe Islands.

Approvals

P/F Poul Michelsen maintains full traceability so that the history, location, or application of all items on stock can be verified by means of documented and recorded identification. All work processes are constantly monitored and reassessed as the company strives to provide the highest quality of service to all customers by meeting their requirements through a system of continuous improvement in all aspects of the business.

CATERING TO ALL YOUR NEEDS

Through careful planning and risk assessment, P/F Poul Michelsen ensures that all work activities will be carried out safely, with all possible measures taken to remove risks and ensure the health, safety and welfare of workers, contractors, authorized visitors, and anyone else who may be affected by our operations.

P/F Poul Michelsen goes to great lengths to comply with all regulations issued by the Faroese food and veterinary authority, and the Faroese occupational safety & health administration.

The company is committed to lead the industry in becoming as eco-friendly as possible. A part of this strategy is to minimize toxic emissions through the selection and use of our fleet and regulating the source of its power requirements and by evaluating operations and ensuring they are as efficient as possible. The goal is to meet and exceed all the environmental legislations that relate to the company.

CLEANING PRODUCTS FOR THE INDUSTRY AND VESSELS

Arni Gunnarsson, Sales Manager

KEMILUX is a Faroese company that since 1967 has offered a growing range of quality detergents/cleaning agents for an industrial or marine environment.

Kemilux has had great success over the years selling S-1 EXTRA for heavy duty cleaning. S-1 EXTRA cleans all ships surfaces from the machine room to the bridge. Kemilux has further developed this noteworthy cleaning agent to live up to the requirements of the Danish Veterinary Directorate, so that it also can be used in the manufacturing machines of the food industry. This approved heavy duty cleaning agent is called S-2 EXTRA.

Close interaction with the Faroese fishing industry has been and still is a driving force for Kemilux in the development of its products.

A wide choice of cleaning products can be obtained from Kemilux, from heavy duty cleaning agents of ship's decks to specific products specifically developed for the demanding food processing industry.

“Together, we can find a clean solution”

Kemilux supplies RUST SOLVENT and RUST WASH for outside maintenance. Rust stains on painted surfaces can be treated and rinsed off with water. This is a great advantage on board ships and elsewhere, where maintenance requires a lot of manpower.

On all modern fishing boats, there are all types of cleaning requirements that can only be dealt with by a modern product range. This is what Kemilux unfailingly delivers.

Eli Lassen, Managing Director

Atlantic Supply Base (ASB in short) is a Faroese owned oil industry and Logistics Company. It is located in Runavík on Eysturoy – the second largest island, a one-hour drive from Vagar airport. This makes ASB an ideal collaborator in operations West of Shetland and the Northern North Sea.

The company's main objective is to provide integrated offshore supply base services to Oil Companies engaged in offshore exploration in the North Atlantic. This includes quayside handling, storage facilities, Dry and wet Bulk Plant, Maritime Agency services and all-round human resources. There is no tide at the ports, which are open all year round. The entrance depth at our port is 20 meters.

Established in 1999, ASB is one of the most experienced partners of the oil industry in the Faroes. When the Faroe Islands first started out in oil expeditions in 2000, ASB played a major role in establishing the Faroe Islands as a significant force in the international oil industry, and the company has continued to grow ever since, expanding its base of operations beyond Faroese waters to the United Kingdom Continental Shelf (UKCS).

QUALITY PRODUCTS FOR THE MARITIME INDUSTRIES

Capacity/Services

Starting out as a simple trawl mending company in 1969, Vónin quickly became an integral company in the Faroese fish industry and is currently one of the leading trawl producers in the North Atlantic, having expanded into 16 branches in the Faroe Islands, Greenland, Canada, Denmark and Norway. The main office is located in Fuglafjørður.

In addition to trawl mending and producing, Vónin’s other services includes lifting gear, ropes, steel wires, chains, steel goods, safety nets, product control and tests and wire-spooling to name a few. Vónin is equipped with talurit presses, a test-bench and wire-spooling devices, and also offers know-how in technical and practical matters.

“We can help our offshore clients with their challenges with lifting gear, ropes, wires, steel goods, and safety nets”

Certificates

The entire staff at Vónin is HSEQ certified and have additionally received the required training in making work related tests and certifications while being involved in the development of products themselves. Vónin is certified in the Achilles Joint Qualification System and is in the process of implementing ISO9001, ISO14001 and OHSAS18001.

Dennis Holm, Mayor of Vágur

PORT OF VÁGUR – THE NEAREST PORT AT YOUR SERVICE

Located on Suðuroy, the southernmost island of the Faroe Islands, The Port of Vágur is the nearest port to the active oil fields west of Shetland; only 96,2 nautical miles from the Rose Bank oilfield, and 84,4 nautical miles from the Cambo oilfield.

The Port of Vágur is open 24 hours, 365 days per year, and has a 24-hour pilot service. The port is never closed because of weather conditions. Sheltered by a deep fjord, the port is safe and easily accessible; it is completely isolated from currents and waves with a tidal range of max. 1 meter.

The North harbour in the Port of Vágur includes more than 350 meters of quayside with 7.5 meters depth or more. 86 meters are by the deep harbour, with a depth of 10 meters; 146 meters quayside with 8.5 meters depth; and 130 meters quayside with 7.0 meters depth.

The North harbour also includes a ro-ro wharf. By the North harbour there is a large open storage area, more than 8.000 m2, available for the offshore oil industry. The North harbour also has an indoor storage 1.700 m2 wide.

Geographic coordinates of the Port of Vágur:
Latitude: 61o28 N, and 6o48m W.
